Lovington Planning and Zoning Application

Thank you for your interest in the City of Lovington. In order to ensure a high quality of life, the community has established standards for the development of property. The following guide is intended to offer the public general information about City planning and zoning requirements before they invest in property or extensive development plans. It should not be construed as comprehensive, however, as additional regulations apply to subdivisions and each zone. Prospective applicants are encouraged to setup a pre-application meeting by contacting Planning and Zoning Coordinator at 575-396-9301.

Zoning Ordinance

The first step in developing property is to identify the zoning, which determines the allowable use of the property. Lovington has four zones: single-family residential, multi-family residential, commercial, and industrial. The following is a list of allowable uses in each zone. For your reference, a zoning map is available in the Planning and Zoning office at City Hall or on line at the City of Lovington website (www.lovington.org)

Single-Family Residential Zone A Single-family homes of at least 800 square feet; city-owned or operated parks and playgrounds; churches; public schools; golf courses; nurseries and truck gardening; home occupations; accessory buildings not involving the conduct of a business; temporary buildings; and certain types of signage.

Multi-Family Residential Zone B Any use permitted in the single-family residential zone; two-family homes containing at least 600 square feet per family; multi-family homes containing at least 300 square feet per family; professional offices or studios; boardinghouses and lodging houses; certain nonprofit organizations; hospitals and clinics; certain private clubs and lodges; and accessory buildings.

Commercial Zone C Any use permitted in the single-family or multi-family residential zones; advertising signs and billboards; amusement places or theaters; trailer and tourist camps or courts.

Industrial Zone D Any building or premises may be used for any purpose not in conflict with any ordinance of the city regulating nuisances.

With the exception of mobile home parks, mobile and manufactured homes are not permitted by right in any zone. To site one of these homes the owner must receive approval from the City. This may be accomplished by following the procedures herein and completing the attached Planning and Zoning Request Application and the appropriate supplemental application.

If the current zoning does not allow for the intended use the landowner may request a variance, special use permit, conditional use permit, or zone change. Street or alley vacations and annexations are also permitted under the zoning ordinance.

Variance Minor deviations from the zoning ordinance may be resolved through the issuance of a variance. These exceptions are generally limited to building setbacks and lot size requirements.

Special Use Permit Some uses cannot be properly classified into a zone without consideration of the impact of the use upon adjacent properties and the public. Examples include commercial greenhouses, hospitals, and public buildings.

Conditional Use Permit There are also special uses which are only allowed if certain conditions are met. For example, a conditional use permit may be granted for a commercial greenhouse in a residential zone, provided the facility limits operating hours.

Zone Change The City Commission may change the zoning classification on parcels of land within the City. These changes in zoning are only granted to meet the current land use needs of the community.

Vacation City staff also reviews requests for the vacation of streets and alleys. Vacating a street or alley right-of-way eliminates the City's interest and returns ownership of the area to the abutting property owners.

Annexation Landowners may annex property into the City. Annexation generally provides access to city services, such as street maintenance. This process also requires a petition signed by the owners of a majority of the number of acres in the contiguous territory.

To apply for a zoning change the property owner must complete the attached Planning and Zoning Application and the supplemental Zoning Application.

Subdivision Regulations

Property may be subdivided for development through the approval of a plat/replat or the alternate summary process. This process offers city staff an opportunity to review larger issues that may arise from development, such as storm water drainage or the extension of utilities. The tract must be zoned for the intended use prior to the submission of a subdivision application.

Plat/Re-plat Landowners may subdivide property for the purpose of development. This process requires the property to be platted. The re-platting process is used on subdivisions to change lot sizes, streets, or configurations.

<i>Alternate Summary</i>	Subdivisions with not more than three lots, or re-plats where the total number of lots does not increase, may use this procedure. This administrative procedure eliminates several steps in re-platting a tract.
<i>Variance</i>	Minor deviations from the subdivision regulations may be resolved through the issuance of a variance.
<i>Mobile Home Park</i>	Mobile home parks are permitted in Zone C; however, any tract proposed for a park must be platted in accordance with the multi-family residential zone. Additionally, each home will require a manufactured or mobile home placement permit.
<i>Recreational Vehicle Park</i>	Recreational vehicle parks are permitted in Zone C; however, any tract proposed for a park must be platted in accordance with the multi-family residential zone.

To apply for any of the above the property owner must complete the attached Planning and Zoning Application and the supplemental Subdivision Application.

Development Permits

City zoning and subdivision approval is required prior to the submission of any development permits. Generally, permits are required to construct, alter, repair, remove, demolish, or move any building or structure within the City. These include the following:

<i>Building</i>	State building permits are required for the construction, repair or demolition of site-built or modular homes. These include permits for plumbing, electrical, and structural work.
<i>Mobile/Manufactured</i>	Single-wide homes must be located in an approved mobile home park, or in zones B or C. Double-wide homes are permissible in zones A, B, or C. The State also receives a copy of the permit and will follow-up with an inspection to ensure the home meets or exceeds applicable HUD regulations.
<i>Carport</i>	Carports are permissible in any zoning district, provided they meet the standards as specified in Chapter 17.20 of the Lovington Municipal Code.
<i>Water/Sewer Connections</i>	Water connections are performed by the water department. Sewer connections must be performed by a licensed contractor and are inspected by the City after the project is completed.

Curb Cut

Property owners may request a curb cut permit for the construction of a new driveway. All cuts must be made in conformance with Chapter 12.04 of the Lovington Municipal Code.

Sign

A permit is required prior to the erection of temporary or permanent signage. All signage must conform to Chapter 12.20 of the Lovington Municipal Code.

To apply for any of the above the property owner must complete the attached Planning and Zoning Application and the appropriate development permit application.
